

“ALL IN ONE”

BAKON® FEED COMPLEX PREMIX

ADVANTAGES TOWARDS THE MARKET

- >> Bakon increases shell quality and brightness. It creates differences with its shell color and quality of yolk and albumen;
- >> Creates a taste unique to BAKON® eggs;
- >> Increases shelf life;
- >> Attracts buyers by virtue of the external and internal visual quality of the egg.
- >> Eggs with BAKON® provide the producers easy marketing and better selling conditions.

ADVANTAGES IN TERMS OF COSTS

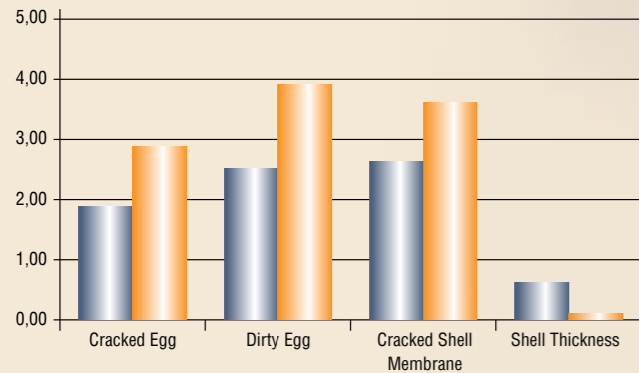

- >> It is cheaper than the standard feed.
- >> Its content structure minimizes feed consumption.
- >> Provides the opportunity to choose the cheapest main feed ingredient.
- >> Dealing with only one feed additive substantially reduces costs.

BAKON® LAYER FEED COMPLEX PREMIX CONTENT

VITAMINS	VITAMIN A	AMINO ACIDS	DL METHIONINE
	VITAMIN D3		M.H.A
	VITAMIN E		L-LYSINE
	VITAMIN K3		LYSINE SULPHATE
	VITAMIN B1		THREONINE
	VITAMIN B2		TRYPTOPHAN
	VITAMIN B6	ENZYMES	XYLANASE
	VITAMIN B12		CELLULASE
	NIACIN		PHYTASE
	CALPAN ACID		A.AMYLASE
	FOLIC ACID		PECTINASE
	D-BIOTIN		B-GLUCANASE
	CHOLINE CHLORIDE		LIPASE
	VITAMIN C		CANTHAXANTHIN
MINERALS	CALCIUM	YOLK COLORANTS	APO ESTER
	PHOSPHORUS		LUTEIN
	SODIUM		ZEAXANTHIN
	MANGANESE		XANTHOPHYLL
	IRON	ORGANIC ACIDS	PROPIONIC ACID
	ZINC		FORMIC ACID
	COPPER		CITRIC ACID
	IODINE		SORBIC ACID
	COBALT	OTHER INGREDIENTS	SACCHAROMYCES CEREVISIAE
	SELENIUM		HSCAS
	MAGNESIUM		ANTIOXIDANTS
	MOLIBDENIUM		ANTICOCCIDIALS
	CHROMIUM		PROTEIN SOURCES

LAYER GROUP

BAKON®

ALL IN ONE

LAYER FEED WITH BAKON®

CEREAL (corn, wheat, etc.) + MEAL (soybean, sunflower, etc.) + BAKON®

The most important objective of the egg industry is to obtain nutritive and high quality eggs from healthy hens. The best way to achieve this, is by using good quality feed with right additives in the production. Bakon Feed Additives are premixes prepared in light of cutting edge developments in feed technology. These special mixtures, developed by our company's long-term R&D work, is registered with the name of "BAKON®". "BAKON® LAYER FEED COMPLEX PREMIX", prepared with special formulation for healthy flocks and quality eggs, optimizes the feed to include all additives at ideal levels required by nutritive and healthy feed.

OUR FREE OF CHARGE SERVICES PROVIDED TO ALL PRODUCERS USING BAKON

Permanent after-sale support is provided through:

- >> "Consultancy Service" covering poultry house checks and general control of the manufacturing site;
- >> "Feed Formulation Software" helping our customers prepare feed formulations and develop their price analysis;
- >> "Veterinary Software" helping our customers diagnose and treat poultry diseases and enable them to follow vaccination and medication programs.

Detailed information on our after-sale services can be found at our web site www.dsakimya.com.tr, under the "Special Services" section.

DOSAGE: 25 kg per 1 ton feed

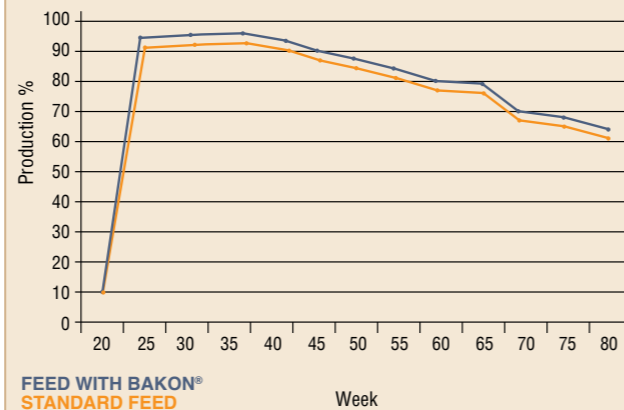

CONTRIBUTION TO PERFORMANCE

- Faster increase in live weight;
- Less feed consumption;
- Shorter term for entering the laying period;
- More uniform flocks and eggs;
- Increased quality of the yolk, the shell and the shelf life;
- Longer peak periods;
- Decreased rate of mortality, broken and dirty eggs;
- Higher immunity against diseases for flocks;
- High performance after moulting;
- Approximately 8-10 weeks gain in passing to thin shell period.

BAKON® FEED AND STANDART FEED COMPARISON

PRODUCTION

GENERAL BENEFITS

- >> It is a perfect premix; simplifies the feed preparation.
- >> Enriches the feed content and provides a healthy and well-balanced diet, specially formulized for breed and each age range;
- >> Eliminates dependence on amino acids and includes all enzymes;
- >> No need to use additional preservatives, as it includes all at perfect levels;
- >> All feed ingredients in premixes are original and pure;
- >> Provides freedom in choosing the meal and cereal type and needs only one type of cereal.
- >> Provides specific options for layers with problems;
- >> It standardizes the feed and provides continuous efficiency.
- >> Ensures feed hygiene with qualified preservatives.

TYPE OF BAKON® LAYER FEED COMPLEX PREMIXES

1- BAKON® Chicken Feed Complex Premixes

Used from first week through the beginning of laying period.

2- BAKON® Layer Feed Complex Premixes

Used from the beginning of laying period.

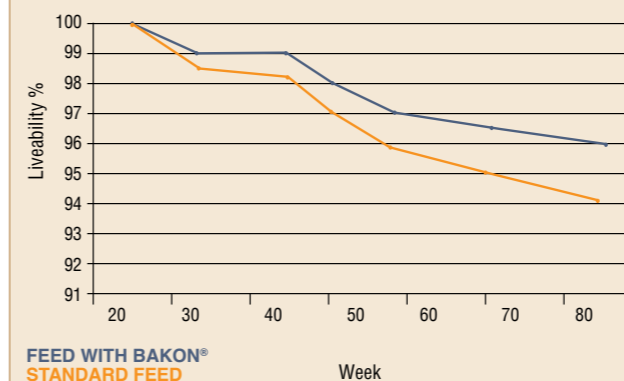

FEED INGREDIENTS

- >> Regional Cereals; corn, barley, wheat
- >> Oilseed meals; soybean, sunflower
- >> Bran-oil
- >> Limestone-salt
- >> Along with above, using BAKON® LAYER FEED COMPLEX PREMIX will be sufficient for obtaining desired results.
