CONTINUOUSLY DEVELOPING PRODUCT

DSA AGRIFOOD PRODUCTS CO. IS ESTABLISHED BY AGRO. ENGINEER H.DENİZ KAYDI AND AGRO. ENGINEER M.ŞAHİN AKDENİZLİ IN 2006 AT ANKARA.

Partners of our company working long years on the field of poultry and ruminant feed sectors. With their experience and the improved scientific and technological knowledge, they are offering a new and different system. With the classic system, our customers getting the main feed ingredients such as; corn, barley, wheat and trying to mix the additives one by one, this way is very difficult and not sensitive. Our company is using a new way and a new system by preparing a new mixture of all necessary additives with a special formula and offering this mixture ready to mix to the main feed ingredients, this can be named as "ALL IN ONE" mixture.

This special mixture is formulated by a long R&D work, and registered with the name of BAKON® Our products are offered under the groups called "BAKON® Feed Complex Premix", "BAKON® Feed Concentrates" and "BAKON® Feed Additives". The major advantages of our

products are the profitability, ease of use and the appreciable increase in the performance and the quality of the egg, milk and meat productions. These advantages are recognized by our customers in a very short time and brought us very high demand both in Turkey and from foreign countries. Our export business is continuously increasing as well. All of our feed ingredients that are used in BAKON® are imported in the pure form, by demanding quality certificates from the best manufacturers around the world.

Our Special Services

Regarding the general control of manufacturing sites and the following up the scientific conditions of the feeding areas, we provide cost free "Consultancy Service" to our "BAKON®" using customers by our expert veterinary personnel. On the other hand, our Feed Formulation and Veterinary software packages, which are prepared by our R&D team by long studies are offered cost

free, to our customers as well. By the help of the "BAKON® Feed Formulation" software, our customers can easily prepare their own feed formulation, and their own price analyses. "BAKON® Veterinary" software guide them to diagnose and treat the diseases and follow up the necessary vaccinations and medication. These programs are continuously updated and technical service is provided.

Our Mission

Our mission is to follow up the new improvements in animal feeding systems and new inventions in animal feed additives all over the world. Applying the new improvements to our products, will provide us to obtain the most effective and the highest quality animal products (egg, milk and meat). With this continuously developing product, our goal is to make "Bakon" the most preferred brand in the market. Mainly all poultry and ruminant integrated plants in Turkey and in foreign countries is our target market.

Our Capacity

Our factory is stated on a 10.000 m² area and it has got 3.600 m² factory building. The capacity of our factory is to produce 10 tons/hour Feed Complex Premixes, Feed Concentrates and Feed Additives. Capacity is 25.000 tons /year under normal conditions. Since our products are high tonnage materials, our company is ready to arrange the transportation in Turkey.

Our Vision

Our vision is, by following up the latest scientific improvements, to derive new aspects on practical feeding systems and provide continuous development and to be the leader of the Feed Additive Industry. The companies using "BAKON®" products, yielding higher quality and higher performance on the amount of their eggs, milk and meat products. By our special services, our clients are supported continuously with a very effective way.

Our free of charge service
